Dirac Live® is a state-of-the-art digital room correction technology that employs a sophisticated analysis of your speakers and listening room to optimize the speakers' overall audio performance and remove sound colorations introduced by the room.. The Dirac Live 'room correction' system was originally conceived in 2001 by a group of PhD students in the Signals and Systems group at Uppsala University in Sweden.

And that's not a coincidence The founders of Dirac the company chose the name because Dirac the physicist's work plays a fundamental role in their monitor and room acoustics correction algorithm.. The result is substantially improved musical staging, clarity, voice intelligibility, as well.. Live In The StudioThere are three elements to Dirac Live For Studio: two software and one hardware.. That's the thing about theoretical physics: ideas that, at the time of conception, seem almost beyond the esoteric and of absolutely no practical value can turn out years (or even decades) later to have real-world applications.. The hardware element is an omnidirectional measurement mic, and Dirac recommend the MiniDSP UMIK-1 USB from www.. Now however, with the launch of the Dirac Live For Studio plug-in, Dirac is joining Sonarworks, ARC and Trinnov in the pro audio room and monitor acoustics correction market.. Welcome to the Dirac Activation page This page lets you register a Dirac software license using the activation key from Dirac..
